January / February (1) 1–103
March / April (2) 105–210
May / June (3) 211–316
July / August (4) 317–416
September / October (5) 417–510
November / December (6) 511–616

SUBJECT INDEX

Ablation dynamics, laser transfer imaging, investigation by ultrafast microscopy, 180
Aerial photography
  canopy measurement, quantum sensor and fisheye photography with image analysis, 389
  color infrared, image analysis, detection of pond cypress tree stress, 196
  color infrared film, cypress tree stress detection, 487
Albumen prints, gelatin printing-out-paper prints and, chemical restoration, 56
Analysis
  image, paper texture characterization
  image stability, wet-plate negatives, Mathew Brady Studios, 297
Analytical electron microscopy, image analysis and, color motion picture film, 273
Analytical methods, microgelometer study, physicomechanical properties of collagen fragments, 544
Antifoggant effects, silver sulfide conversion in gold-thiourea complex solution, tracing by x-ray diffraction, 540
Apparatus, infrared diode thermal imaging, CREO/Crosfield interface, 220
Arrhenius test, evaluation of thiosulfate tolerance, black-and-white aerial film, 42
Atomic force microscopy
  AgBr tabular grains, surface effects of iodide, 268
  Tabular silver bromide microcrystals, study, 361
Autostereograms, random dot and line, generation and animation, 260
Benzothiolinium dyes, cyanine and, sensitizing dyes, novel class, 124
Book Reviews
  Norman Goldberg, 596
  Thomas Eugene Avery and Graydon Lennis Berlin, 502
Cellulose triacetate
  motion picture film base, degradation and stabilization, 4
  simulated aging, motion picture film, 21
Chemical sensitization
  dependence on iridium concentration, microwave photoconductivity, photographic properties of silver halides, 105
  Eu's^{3+} doping effect, silver iodobromide emulsion, 350
  ripening process, partially decomposed DNA, antifoggant and sensitizer, 287
Collagen, physicomechanical properties of fragments, microgelometer study, 544
Color correction, semiautomatic printer calibration, scanners, 211
Color films, design, colorimetric analysis, 63
Color images
  correction, 4-neighbors interpolation method, 73
  heat electrophotographic xeroprinting, negatively charged, 81
Colorimetry, color film design and, 63
Color infrared imaging, cypress tree stress detection, aerial photography, 487
Color measurement, inks and paper, graphic arts, 238
Color printing, xerography, tri-level, 366
Color print measurements, additivity of reflection density, 511
Color processing effluents, treatment, activated sludge process, 405
Color proofing
  delayed tack adhesive technology, toner in photopolymer proofing, 225
  delayed tack toner kinetics, solubility and hydrodynamics, 232
  negative-working tonable photoimaging, acid-labile acrylic polymers, 243
Color reproduction
  equalization, 328
  halftone printing, color gamut, 496
  photographic color prints, additivity of reflection density, 511
  scanner calibration, 162
Color transparencies, electrophotographically generated, colorimetric analyses, 491
Computer-aided design, interactive 3-dimensional modeling and, 188
Computer graphics, hyperdimensional, parallel planes coordinates, 591
Computer model, Sabatier effect, 558
Coordinate systems, parallel planes, hyperdimensional computer graphics, 591
Copper complexes, nonsilver images, with derivatives of 3-benzoylthiourea, 550
Crystal growth, silver halide tabular grains, atomic force microscopy, surface effects of iodide, 268
Crystallography, silver sulfide in gold-thiourea complex solution, tracing conversion, x-ray diffraction, 540
Crystal structure, halogen and copper ions, silver halides, nearest-neighbor distances of impurity, 115
Cyanine dyes, benzothiolinium and, sensitizing dyes, novel class, 124
Densitometry, additivity of reflection density, photographic color prints, 511
Detackification
  toner, photopolymer proofing, 225
  toner kinetics, solubility and hydrodynamics, 232
Developers, two-component, triboelectric properties, xerography, 335
Development, monocomponent, nonmagnetic, cleanerless laser printer, 382
Development center distribution, silver bromide emulsions, tetrazolium compounds, broadening effects, 356
Diazo materials, light-sensitive, water-soluble, synthesis and properties, 317
Digital halftone images, improvement, semiautomatic printer calibration, scanners, 211
3-Dimensional modeling, interactive, 2-dimensional perspective input and, 188
Dislocations, silver bromide, interstitial silver atoms, 457

January / February (1) 1–103
March / April (2) 105–210
May / June (3) 211–316
July / August (4) 317–416
September / October (5) 417–510
November / December (6) 511–616

Detackification
  toner, photopolymer proofing, 225
  toner kinetics, solubility and hydrodynamics, 232
Developers, two-component, triboelectric properties, xerography, 335
Development, monocomponent, nonmagnetic, cleanerless laser printer, 382
Development center distribution, silver bromide emulsions, tetrazolium compounds, broadening effects, 356
Diazo materials, light-sensitive, water-soluble, synthesis and properties, 317
Digital halftone images, improvement, semiautomatic printer calibration, scanners, 211
3-Dimensional modeling, interactive, 2-dimensional perspective input and, 188
Dislocations, silver bromide, interstitial silver atoms, 457

DNA, partially decomposed, chemical ripening, antifoggant and sensitizer, 287
Dopants, molecular, charge transport, binder effect, 477
Dye-transfer, high-speed printing process, application to rough paper, 171
Earth studies, remote sensing of atmosphere and surface, digital array scanned interferometer, new imaging spectrometer, 417
Effluent treatment, photoprocessing, activated sludge process, 405
Electronic imaging, retouching photographic materials by hand and, comparison, 306
Electrophotographic developers, macroscopic and electronic models, 209
Electrophotography
  $CdS \cdot nCdCO_3$-resin dispersion-type photoreceptor, hysteresis sensitization effect, 579
  charge transport, binder effect, molecularly doped systems, 477
  color correction technique, 4-neighbors interpolation method, 73
  color transparency images, colorimetric analyses, 491
  dual-layered photoreceptors, with copper phthalocyanines, 135
  fuser system, heat transfer and toner melting, 88
  heat electrophotographic xeroprinting, negatively charged, 81
  highlight color printing, new machine, 366
  liquid toner composition, toning parameters, effect on images, 151
  novel unsymmetrical squaraines, solid-state and xerographic properties, 567
  organopolysilane-based memory charge transport film, ultraviolet light irradiation, 256
  photoactive pigments, Dreiding force field, application to perylene photogenerators, 373
  photoreceptor, with bis(tripropylsiloxy)silicon naphthalocyanine, 574
  prints and copies, color background, assessment, 249
  q/d meter and, electrical charge measurement, toner particles, 142
  soluble naphthocyanines, near-infrared photoconductors, 131
  xerography, two-component developers, triboelectric properties, 335
Electrostatic image transfer, image deterioration, observations, 376
Electrostatic imaging, liquid toner composition, toning parameters and, effects, 151
Encapsulation, interfacial/free radical polymerization, emulsification conditions, particle size distribution, 587
Fluorescence probe analysis, monitoring of polymerization rates, polyolacrylates, effect of polymerization for bleaching photoinitiator system, 322
Fractal analysis, satellite observations and, assessing deforestation and habitat fragmentation, Uganda, 440
Gelatin
  effect on agglomeration, fine AgBr crystals, precipitation in continuous reactor, 517
  physicomechanical properties of collagen fragments, microgelometer study, 544
Geophysics, remote sensing of Earth's atmosphere and surface, digital array scanned interferometer, new imaging spectrometer, 417
Graphic arts, fundamental color measurement, inks and paper, 238
Halftone color printing, color gamut, 496
High contrast, tetrazolium compounds, silver halide photography, II, 462
Hysteresis effect, $CdS \cdot nCdCO_3$-resin dispersion-type photoreceptor, 579
Image analysis
  analytical electron microscopy and, color motion picture film, 273
  characterization of texture of paper, 99
  color infrared aerial photography with, detection of pond cypress tree stress, 196
  design of color films, colorimetry, 63
  quantum sensor and fisheye photography with remote sensing, canopy measurement, 389
Image conservation
  cellulose triacetate motion picture films, simulated aging, 21
  image access and, laser disk technology, agricultural landscape, 60
  motion picture film, cellulose triacetate base, degradation and stabilization, 4
  motion picture film and videotape, polyester degradation, 13
  permanence standards, imaging materials, ANSI, 37
  video images, 1
Image evaluation, multispectral videography, radiometric quality, statistical characteristics, spatial resolution, 394
Image processing
  airborne ocean color imager, description and image processing, 423
  digital, scanning transmission electron microscope, analysis of silver halide microcrystals, 534
  retouching photographic materials, by hand or electronically, comparison, 306
  zero-phase blurs, blind image restoration, 206
  zone analyzer, plant pathology research, 201
Image quality
  electrophotographically generated color transparencies, colorimetric analyses, 491
  electrostatic image transfer, image deterioration, observations, 376
Image restoration
  albumen and gelatin printing-out-paper prints, chemical restoration, 56
  faded silver gelatin negatives, image quality, 46
Image stability
  black-and-white aerial films, evaluation of thiosulfate tolerance, Arrhenius test, 42
  thermal dye transfer video prints, evaluation by accelerated fading tests, 29
  video image preservation, 1
  wet-plate negatives, analysis, Mathew Brady Studios, 297
Impurities, halogen and copper ions, silver halides, nearest-neighbor distances, 115
Infrared diode imaging, thermal, CREO/Crosfield interface, 220
Infrared imaging, monitoring environmental change, vector-borne disease, considerations for a small satellite, 431
Ink-jet inks, thermal jet printing, 176
In Memoriam
  Albert Rose, v(3)
  Lewis E. Walkup, v(5)
  Walter Clark, iv(2)
  Roland Michael Schaffert, v(2)
Interferometry, digital array scanned interferometer, new imaging spectrometer, remote sensing of Earth, 417
Interstitial silver, atoms, dislocations in silver bromide, 457
Introductions to Special Sections
  Conservation of Images, v(1)
  Earth System Science Research, vi(5)
  Electronic Prepress Technology and Color Proofing, vi(3)
Iridium sensitization, concentration dependence, microwave photoconductivity, photographic properties in silver halide emulsions, 105
Landsat imagery, fractal analysis and, assessing deforestation and habitat fragmentation, Uganda, 440
Laser ablation imaging, dynamics, investigated by ultrafast microscopy, 180
Laser direct imaging, visible, chemically amplified photoresist, 468
Laser disks
  storage and retrieval, image preservation and, laser disks, agricultural landscape, 60
Laser printers
  cleanerless, monocomponent, nonmagnetic development, 382
  electrophotographic fuser system, heat transfer and toner melting, 88
Latent image
  AgBr emulsions, multiflash responses, thermal escape rate distribution of trapped holes, 525
  dislocations in silver bromide, interstitial silver atoms, 457

Latent image distribution, silver bromide emulsions, tetrazolium compounds, broadening effects, 356
Light-sensitive materials, water-soluble diazo, synthesis and properties, 317
Liquid toners, composition, toning parameters and, effect on electrostatic images, 151
Lithography, characteristics, inorganic photoresists, 562
Luminescence centers, S-doped silver bromide, 282
Masking, 4-neighbors interpolation method, color correction technique, 73
Microcapsules, interfacial/free radical polymerization, emulsification conditions, particle size distribution, 587
Microscopy, scanning transmission electron microscope, digital image processing, analysis of silver halide microcrystals, 534
Microscopy, ultrarapid, dynamics of laser ablation transfer imaging, investigation, 180
Microwave photoconductivity, photographic properties and, dependence on iridium concentration, silver halide emulsions, 105
Mobility effects, molecularly doped systems, 477
Motion picture film stability
  cellulose triacetate base, degradation and stabilization, 4
  processed cellulose triacetate, simulated aging, 21
  videotape materials and, polyester degradation, 13
Multidimensional images, parallel planes coordinates, hyperdimensional computer graphics, 591
Multispectral sensors, radiometric quality, statistical characteristics, spatial resolution, evaluation, 394
Naphthalocyanines, soluble, near-infrared photoconductors, 131
Noise analysis, blind image restoration, for zero-phase blurs, 206
Non-impact printing
  high-speed dye-transfer, application to, 171
  thermal jet printing, hot melt ink, 176
Nonsilver images, from Cu(II) complexes, with derivatives of 3-benzoylthiourea, 550
Ocean color, airborne image, description and image processing, 423
Organic photoconductors
  charge transport binder effect, molecularly doped systems, 477
  Dreiding force field, application to perylene photogenerators, 373
Organopolysilane, based memory charge transport film, ultraviolet light irradiation, xeroprinting, 256
Paper texture, characterization, image analysis, 99
Photoconductivity
  Dreiding force field, application to perylene photogenerators, 373
  high contrast and, tetrazolium compounds, silver halide emulsions, 290
Photoconductors
  electrostatic image transfer, image deterioration, observations, 376
  near-infrared, soluble naphthalocyanines, 131
  novel unsymmetrical squaraines, solid-state and xerographic properties, 567
Photodecomposition, ultraviolet light, organopolysilane-based memory charge transport film, xeroprinting, 256
Photographic emulsions
  multiflash responses in AgBr, thermal escape rate distribution of trapped holes, 525
  precipitation of fine AgBr crystals, continuous reactor, gelatin effect on agglomeration, 517
Photographic image stability, permanence standards, ANSI, 37
Photographic processing, black-and-white aerial films, evaluation of thiosulfate tolerance, Arrhenius test, 42
Photointerpretation, aerial photographs, cypress tree stress detection, color infrared film, 487
Photolithography, lithographic characteristics, inorganic photoresists, 562
Photopolymerization, rates of polyolacrylates, monitoring by fluorescence probes, depth for bleaching photoinitiator system, 322
Photopolymers
  delayed tack kinetics, solubility and hydrodynamics, 232
  light-sensitive, water-soluble diazo material, synthesis and properties, 317
  proofing, delayed tack adhesive technology, toner, 225
Photoprocessing effluents, treatment, activated sludge process, 405
Photoreceptors
  $CdS \cdot nCdCO_3$-Resin dispersion-type, hysteresis sensitization effect, 579
  electrophotographic, with bis(tripropylsiloxy)silicon naphthalocyanine, 574
  electrophotographic dual-layered, with copper phthalocyanines, 135
Photoresists
  chemically amplified, visible laser direct imaging, 468
  inorganic, lithographic characteristics, 562
Phototackifiable layers, acid-labile acrylic polymers, negative-working tonable photoimaging, 243
Phthalocyanines
  bis(tripropylsiloxy)silicon naphthalocyanine, electrophotographic photoreceptor, 574
  copper, electrophotographic dual-layered photoreceptors, 135
Plant biochemical content, potential remote-sensing requirements, scientific issues, 446
Plant pathology, research, zone analyzer, image analysis for measurement, 201
Polyester films, degradation, motion picture film and videotape materials, 13
Polymer imaging, acid-labile acrylic, negative-working tonable photoimaging, 243
Polymerization, interfacial/free radical encapsulation, emulsification conditions, particle size distribution, 587
Printed circuit boards, visible laser direct imaging, chemically amplified photoresist, 468
Printer calibration, semiautomatic, scanners, 211
Printers, cleanerless laser printer, monocomponent, nonmagnetic development, 382
Printheads, thermal, resistive ribbon, forty dot/millimeter, 93
Printing, fundamental color measurement, inks and paper, 238
q/d meter, electrical charge measurement, toner particles, 142
Reactive ion etching, resistive ribbon thermal printhead, forty dot/millimeter, 93
Remote sensing
  airborne ocean color imager, description and image processing, 423
  color infrared aerial photography, image analysis, detection of pond cypress tree stress, 196
  Earth's atmosphere and surface, digital array scanned interferometer, new imaging spectrometer, 417
  monitoring environmental change, vector-borne disease, considerations for a small satellite, 431
  multispectral videography, radiometric quality, statistical characteristics, spatial resolution, 394
  plant biochemical content, potential requirements, 446
  quantum sensor and fisheye photography with image analysis, canopy measurement, 389
  satellite observations, fractal analysis, deforestation and habitat fragmentation, Uganda, 440
Restoration of photographs, albumen and gelatin printing-out-paper prints, chemical restoration, black-and-white negatives, chemical restoration, 46
Retouching, photographic materials, by hand or electronic imaging, comparison, 306
Sabatier effect, computer simulation, 558
Satellite systems
  fractal analysis of observations, deforestation and habitat fragmentation, Uganda, 440
  monitoring environmental change, vector-borne disease, preliminary considerations, 431
Scanner calibration, color, 162
Sensitization
  benzothiolinium cyanine dyes, study, 124
  silver bromide emulsions, tetrazolium compounds, broadening effects, 356
Sensors, plant biochemical content, potential requirements, 446

Silver bromide
development center distributions in emulsions, tetrazolium compounds, broadening effects, 356
dislocations, interstitial silver atoms, 457
tabular microcrystals, atomic force microscopy study, 361
Silver bromide dopants, luminescence centers, 282
Silver halide dopants, Eu^{3+} silver iodobromide emulsion, 350
Silver halide emulsions
decomposed DNA, antifoggant and sensitizer, chemical ripening, 287
iridium concentration, microwave photoconductivity, photographic properties in, 105
tetrazolium compounds, high-contrast and photoconductivity effects, 290
Silver halides
AgBr emulsions, multiflash responses, thermal escape rate distribution of trapped holes, 525
AgBr tabular grains, *in situ* atomic force microscopy, surface effects of iodide, 268
analysis of microcrystals, modes of scanning transmission electron microscope, digital image processing, 534
fine AgBr crystals, precipitation in continuous reactor, gelatin effect on agglomeration, 517
impurity halogen and copper ions, nearest neighbor distances, 115
relaxed surface, atomistic simulations and SEXAFS, 118
tetrazolium compounds in, high-contrast effects, 462
Silver image quality, black-and-white negatives, chemical restoration, 46
Silver recovery, nonsilver images, from Cu(II) complexes, with derivatives of 3-benzoylthiourea, 550
Silver sulfide conversion in gold-thiourea complex solution, tracing by x-ray diffraction, 540
Solarization, computer model, 558
Spectroscopy, digital array scanned interferometer, remote sensing of Earth's atmosphere and surface, 417
Squaraines, novel unsymmetrical, solid-state and xerographic properties, 567
Standards, status of permanence, imaging materials, ANSI, 37
Stereo imaging
random dot and line, generation and animation, 260
Substrates, electrophotography, color transparency images, colorimetric analyses, 491
Surface analysis, atomistic simulations and SEXAFS, relaxed surface silver halide, 118
Tabular grains, atomic force microscopy, 361
Tetrazolium compounds
high-contrast effects, silver halide photography, 462
silver halide emulsions, photoconductivity and high contrast effects, 290
Thermal imaging, CREO/Crosfield interface, infrared diode, 220
Thermal jet printing, hot melt ink for, 176
Thermal transfer images
high-speed dye-transfer printing, application to rough paper, 171
resistive ribbon thermal printhead, forty dot/millimeter, 93
Thermal transfer image stability, video prints, evaluation of stability, accelerated fading tests, 29
Toner charge, electrical measurement, q/d meter, 142
Toner models, macroscopic and electronic, electrophotographic developers, 209
Toners
color background assessment, electrophotographic prints and copies, 249
heat transfer and, electrophotographic fuser system, 88
Tree canopy studies, aerial photography, color infrared film, 487
Video image stability, preservation, 1
Video prints, thermal dye transfer, evaluation of stability, accelerated fading tests, 29
Wet-plate negatives, image stability, analysis, Mathew Brady Studios, 297
Xerography
tri-level, highlight color printing, 366
two-component developers, triboelectric properties, 335
Xeroprinting, negatively charged heat electrophotographic, 81
X-ray analysis, relaxed silver halide surface, atomistic simulations, SEXAFS, 118
